FOR IMMEDIATE RELEASE

Another High-Tech First for Austin's Construction Industry *Falcon Storage guarantees delivery within two-hour window*

AUSTIN, TX —Time is money. Whether waiting for pizza, the cable guy or a storage container, most folks are not willing to waste a full day to fit into someone else's schedule.

Focusing on customers, Falcon Storage, a Central-Texas portable storage and office space provider, is the first to offer a guaranteed two-hour delivery window. Construction managers, job-site supervisors and homeowners can now accurately plan a busy day without having to drop everything to wait for storage containers to be delivered.

"There is absolutely no reason anyone needs to waste a whole day waiting for portable storage or office space to be delivered," said Brian Dieringer, co-founder of Falcon Storage. "Our goal has always been to put customers first with technology; Falcon Storage sets a higher standard again."

Falcon's First-Class Delivery Promise offers a two-hour delivery guarantee on all products. If a storage container, portable office or Go Mini's arrives late, there is no customer delivery fee.

Storage containers and portable offices can be delivered for a multitude of needs:

- Construction site equipment storage
- Extra or job-site office space; combined office and storage options available
- Retail storage for periods of high inventory
- Interim storage for household goods during a move or remodeling
- Staging for the sale of a home
- Special events

About Falcon Storage

Founded in Austin by ex-dot-com-ers, Falcon Storage is using technology, customer relationship management tools and best practices to revolutionize the on- and off-site storage and portable office industry.

Using only top-quality shipping containers, standard and customized storage containers, portable office and combinations are available across Central Texas. Experienced fabricators can configure storage solutions to meet any specialized need.

For residential customers, Go Mini's offer the protection of metal walls and the convenience of smaller storage that can be delivered to tight locations.
